GO_Biological_Process_2021
peptidyl-tyrosine dephosphorylation (GO:0035335)
oxidative DNA demethylation (GO:0035511)
positive regulation of DNA damage response, signal transduction by p53 class mediator (GO:0043517)
negative regulation of membrane protein ectodomain proteolysis (GO:0051045)
regulation of lens fiber cell differentiation (GO:1902746)
negative regulation of lens fiber cell differentiation (GO:1902747)
