GO_Biological_Process_2021
regulation of short-term neuronal synaptic plasticity (GO:0048172)
membrane depolarization during action potential (GO:0086010)
membrane biogenesis (GO:0044091)
action potential (GO:0001508)
G protein-coupled receptor signaling pathway, coupled to cyclic nucleotide second messenger (GO:0007187)
membrane depolarization (GO:0051899)
central nervous system development (GO:0007417)
long-term synaptic potentiation (GO:0060291)
positive regulation of synaptic transmission (GO:0050806)
membrane assembly (GO:0071709)
